

MANTUO ORIGINAL FOUNDATION EDITION - LNAT - V0.1.0

LNAT Argument Reading and Writing Starting Review Notes

LNAT 论证阅读与写作起点复习笔记

A practical starting path from argument structure and evidence boundaries to English sentence control and timed execution.

从文章结构、证据边界、英文长句到 95+40 分钟的完整执行方法。

The logo consists of the letters 'MT' in a white, bold, sans-serif font, centered within a solid purple square.

MANTUO ADMISSION TEST LIBRARY

不再为升学考试而焦虑

Mantou original foundation edition - independently authored for LNAT preparation

How to Use This Pack

如何使用这份笔记

IN THIS EDITION	A four-module starting map for Section A argument reading, Section B timed writing, EAL evidence control and the 95+40 minute execution plan. 覆盖 Section A 论证阅读、Section B 限时写作、英语长难句与证据边界、95+40 分钟节奏四个模块；包含 21 个知识单元、12 套方法、4 道满托原创逐步例题和 12 组主动回忆。
GO DEEPER	After the Foundation Edition, verify Section A through long-passage sets and 95-minute practice, then develop Section B through 40-minute writing, a human rubric and teacher feedback. Machine scores do not replace real reading and writing evidence. 完成基础版后，通过长文章题组与 95 分钟限时练习验证 Section A，再用 40 分钟写作、人工 rubric 与教师反馈推进 Section B；系统不会用机器分数替代真实阅读与写作证据。
PUBLICATION BOUNDARY	The official LNAT preparation guide and Practice Test Commentary are used only to verify exam structure, skill boundaries and method terminology. All bilingual explanations, methods, examples and active-recall prompts are independently written by Mantou; no official passage, question, option or explanation is copied or adapted. Official files remain in the internal research archive and cannot be downloaded here. 本笔记以 LNAT 官方备考指南与官方 Practice Test Commentary 核对考试结构、能力边界和方法术语；双语解释、方法、例题和主动回忆均为满托独立创作，不复制或改写官方文章、题目、选项与讲解。官方原件只保存在内部研究区，不能从本站下载。

Exam Map

考试地图

WHAT LNAT TESTS 考查目标	LNAT assesses comprehension, interpretation, analysis and argument rather than prior legal knowledge. 考查理解、解释、分析和论证能力，不要求预先学习法律知识。
SECTION A Section A	42 multiple-choice questions across 12 argumentative passages in 95 minutes, usually three or four questions per passage. 95 分钟完成 42 道选择题，围绕 12 篇论证性文章，每篇通常 3-4 题。
SECTION B Section B	Choose one of three prompts and write for 40 minutes, building a concise, balanced and evidence-backed argument. 40 分钟从三道题中选一题写作；重点是简洁、平衡、有证据的说服力论证。
EVIDENCE RULE 证据原则	Section A answers are supported by the passage; personal views and outside knowledge must not replace textual evidence. Section A 的判断依据在文章中；不要用个人立场或文章外知识替代文本证据。
HISTORIC-SOURCE BOUNDARY 历史资料边界	Historic official guidance is used for stable skills and methods, not as current admissions or scoring policy. 本页用历史官方指南说明稳定的能力和方法，并以当前站内考试结构登记核对时长与题量；不把旧资料当作当年录取或评分政策。

Curriculum Bridge

课程衔接：具体缺什么

A curriculum can indicate likely exposure, not mastery. Confirm every claim against the student profile and timed evidence.

课程范围只说明可能学过什么，不等于已经掌握；请结合本人档案和真实练习。

A-Level / IAL	PARTIAL 论证型学科可迁移，LNAT 证据边界需专练
LIKELY TRANSFER	- English Literature, History, Economics and Politics transfer main-idea, evidence, viewpoint and paragraph analysis. English Literature、History、Economics、Politics 等课程能迁移主旨、证据、观点与段落分析。 - School essays transfer thesis statements, topic sentences, counterarguments and judgement. 学校 essay 能迁移 thesis、topic sentence、counterargument 与 judgement。
CHECK ONE BY ONE	- Whether literary interpretation can be replaced by the stricter question of what the passage explicitly supports, without judging style or the author's personality. 能否把文学赏析切换为“文章明确支持什么”，不评价文风或作者人格。 - Whether qualifiers, negative stems, inference strength and plausible but out-of-scope options can be identified. 能否识别限定词、否定题干、推断强度和看似正确但超出范围的选项。 - Whether prompt selection, planning, writing and checking can all fit within 40 minutes. 能否在 40 分钟内完成选题、计划、成文与检查。
FIRST ACTION	Apply the Section A method to one short passage, then build an eight-minute plan using the Section B framework. 先用本页 Section A 方法做一篇短文，再用 Section B 框架写一份 8 分钟计划。

IB Diploma	STRONG START TOK 与 Extended Essay 提供较强起点
LIKELY TRANSFER	- TOK, Language A, History and the Extended Essay transfer claims, evidence, assumptions and counterclaims. TOK、Language A、History 与 Extended Essay 可迁移 claim、evidence、assumption 和 counterclaim。 - IB qualification, evaluation and balanced judgement provide a strong base for Section B. IB 写作中的 qualification、evaluation 与 balanced judgement 可直接帮助 Section B。

CHECK ONE BY ONE	- Whether open-ended discussion habits cause over-inference in Section A instead of selecting the single supported answer. 开放式讨论习惯是否会导致 Section A 过度推断，而不是选择唯一被支持的答案。 - Whether passage structure can be extracted quickly on unfamiliar topics without relying on subject background. 能否在陌生主题下快速提取文章结构，而不是依赖学科背景。 - Whether background can be compressed so that reasoning and counterargument receive enough space. 能否压缩背景说明，把篇幅留给推理链和反方回应。
FIRST ACTION	Map one TOK argument as main conclusion-reasons-counterargument, then test whether every support arrow is justified by the text. 把一段 TOK 论证画成主结论-理由-反方图，再训练每个箭头是否由原文支持。

AP / US High School	STRONG START AP 阅读写作基础可直接迁移
LIKELY TRANSFER	- AP English Language transfers rhetorical situation, claims, evidence, qualification and authorial attitude. AP English Language 可迁移 rhetorical situation、claim、evidence、qualification 与作者态度。 - AP History and social-science DBQ/LEQ writing transfer evidence organisation, counterargument and final judgement. AP History 与社会科学 DBQ/LEQ 可迁移证据组织、反方和结论判断。
CHECK ONE BY ONE	- Whether rhetorical-effect analysis can be converted into a strict text-support relation. 是否能把修辞效果分析转成严格的文本支持关系。 - Whether British command words such as implied, inferred, concluded, except and least supported are familiar. 是否熟悉英式题干中的 implied、inferred、concluded、except 与 least supported。 - Whether classroom background knowledge can be kept out of Section A decisions. 能否避免把课堂背景知识带进 Section A。
FIRST ACTION	Build a command-word to evidence-threshold table, then use elimination notes to record the exact error in every distractor. 先建立题干动词与证据强度对照表，再用排除法记录每个错误选项错在哪里。

■■■■■■■ / Other curricula	PARTIAL 不依赖特定学科，但需验证英文论证阅读
LIKELY TRANSFER	- Claims, reasons, examples, concessions and conclusions from Chinese argumentative writing can transfer into an argument map. 中文议论文中的观点、理由、例证、让步和结论可以迁移为论证骨架。 - Everyday English reading provides a vocabulary and syntax starting point; legal knowledge is not a prerequisite. 日常英文阅读能提供词汇和句法起点，法律知识不是前置条件。

CHECK ONE BY ONE	- Whether long English sentences with parenthesis, reference, contrast and multiple qualifiers can be decomposed. 是否能拆解带插入语、指代、转折和多重限定的英文长句。 - Whether what the author states, what the author implies and what the reader personally believes can be kept separate. 是否能区分作者说了什么、暗示了什么、以及你个人认为应该是什么。 - Whether concentration and pacing can be sustained across 12 unfamiliar passages in 95 minutes. 是否有持续 95 分钟处理 12 篇陌生文章的节奏。
FIRST ACTION	Complete the EAL long-sentence and qualifier audit before moving into the original Section A starting practice. 先完成 EAL 模块的长句和限定词自查，再进入 Section A 原创起点练习。

MODULE 01 - LNAT

Section A Argument Reading

Section A 论证阅读

Reconstruct how the passage reaches its conclusion first, then return every option to the text for verification.

先还原文章怎样得出结论，再让每一个选项回到原文接受验证。

LEARNING OUTCOMES	- Locate the main idea, main conclusion, reasons, examples and counterargument within a passage. 识别主旨、主结论、理由、例证和反方在文章中的位置。 - Distinguish explicit statements, reasonable inferences and claims beyond the passage's scope. 区分明确陈述、合理推断与超出文章范围的判断。 - Validate the answer with textual evidence and name the exact fault in every rejected option. 用原文证据验证答案，并说清其余选项错在哪里。
--------------------------	---

KNOWLEDGE MAP

Check Every Knowledge Unit

逐项核对知识单元

A1	Main and Subsidiary Argument Structure 主次论证结构
A2	Main Point and Central Claim 主旨与核心主张
A3	Purpose and Role of a Statement 语句目的与作用
A4	Statement, Implication and Inference 陈述、暗示与推断

A5	Fact, Opinion and Writer Attitude 事实、观点与作者态度
A6	Answer Boundaries and Distractors 选项边界与干扰项

QUESTION METHODS

What to Notice, How to Start, What to Check

看到什么，怎样开始，如何检查

01	Skim first, then map four argument roles 先通读，再画四格论证图
TRIGGER	The passage is long and detailed, but after reading it you cannot state why the author wrote it. 文章较长，细节很多，读完却说不出作者为何写这篇文章。
ACTION	On the first pass, mark only the topic, central claim, main reasons and a turn or counterargument. On the second pass, reread only the location specified by the question rather than translating every sentence. 第一遍只标记主题、核心主张、主要理由和转折/反方；第二遍只回到题目指定位置精读，不逐句翻译全文。
CHECK	Can you state in one sentence what the author wants accepted and the two most important supporting reasons? 能否用一句话说出作者希望读者接受什么，以及最关键的两条支持理由？

02	Translate task verbs into evidence thresholds 把题干动词转换成证据门槛
TRIGGER	The stem uses stated, implied, inferred, concluded or purpose. 题干使用 stated、implied、inferred、concluded 或 purpose。
ACTION	Stated requires a direct location; implied or inferred permits one minimal reasoning step; concluded requires support across the passage; purpose asks what a sentence does in the argument. stated 要求可直接定位；implied/inferred 允许最小的一步推导；concluded 要求整段支持；purpose 要说明该句在论证中做了什么。
CHECK	If the option needs more than one added step of common knowledge, it has usually crossed the passage's evidence boundary. 如果需要两步以上补充常识才能成立，通常已经越过文章证据边界。

03	Return answers to the text and label distractor errors 答案回原文，错误项做错因标签
TRIGGER	Two options appear plausible, or the choice rests only on intuition. 两个选项都似乎合理，或你只是凭语感选择。

ACTION	Point to the sentence and logical connection supporting each candidate. Label rejected options as over-broad, absolute, reversed, only locally true, concept-shifting or dependent on external knowledge. 为候选答案指出具体句子与逻辑连接；其余选项标记为范围过大、绝对化、方向相反、只说到局部、偷换概念或依赖外部知识。
CHECK	The correct answer must respond to the stem, not merely share the topic; every distractor needs a specific diagnosis. 正确项不仅主题相关，而且准确回答题干；错误项必须能说明具体错法。

ORIGINAL WORKED EXAMPLE

Mantou Original: The Role of a Sentence in an Urban Trees Argument

满托原创例题：城市树木段落中的语句作用

PROBLEM	A short argument says cities should not decide whether to retain street trees only by short-term maintenance cost. It acknowledges pavement damage from roots before arguing for better species and planning. What role does that acknowledgement play? 段落：城市不应只按短期维护成本决定是否保留行道树。成熟树木能降低夏季路面温度，也能减少暴雨径流。确实，树根有时会损坏人行道；但这说明城市需要更好的树种和种植规划，而不是减少树木。问题：提到树根损坏人行道，在论证中主要起什么作用？
Find the claim 第 1 步：找主张	The claim is that short-term maintenance cost should not be the only consideration and cannot justify reducing the number of trees. 主张是不能只看短期维护成本，更不能因此减少树木。
Identify the turn 第 2 步：识别转折	Admittedly introduces the strongest practical concern; but then limits what that concern is allowed to establish. “确实”引入对方最有力的实际问题；“但”随后限制这个问题能推出的结论。
Describe the sentence's function 第 3 步：描述作用	The sentence concedes an opposing reason so that the response can address it directly. It is not the author's final evidence for reducing trees. 该句承认一个反方理由，使后面的回应更有针对性；它不是作者最终支持减少树木的证据。
CONCLUSION	It concedes a concern that might support reducing trees and prepares the author's reply: improve planning rather than reduce the number of trees. 它承认一个可能支持减少树木的反方顾虑，并为作者提出“改善规划而非减少树木”的回应搭台。
COMMON TRAP	Assuming that a sentence mentioning damage must be the author's main reason for opposing tree retention. 只因为句子提到损坏，就把它误判为作者反对保留树木的主理由。

Close the Notes Before You Answer

合上笔记再回答

01	How do the evidence thresholds for stated and inferred differ? stated 与 inferred 的证据门槛有何不同?
ANSWER	Stated information is directly located; an inference allows a minimal necessary step from the text, not outside knowledge. stated 必须能直接定位; inferred 允许由明确文本完成最小、必要的一步推导, 但不能依赖外部常识。
02	Why is topic relevance not enough for a correct answer? 为什么“主题相关”不等于答案正确?
ANSWER	The option must answer the task and match the passage's scope, strength and direction. 选项还必须准确回应题干, 并符合原文的范围、强度和方向。
03	What four roles should the first skim identify? 第一遍通读应该标记哪四类信息?
ANSWER	Topic, central claim, main reasons, and a turn or counter-position. 主题、核心主张、主要理由, 以及转折或反方。

Section B Timed Argument Writing

Section B 限时论证写作

Choose the prompt that can produce the clearest argument, not the one that provokes the strongest emotion or displays the most background knowledge.

选最能形成清楚论证的题，而不是情绪最强或背景知识最炫的题。

LEARNING OUTCOMES

- Assess available reasons, examples and counterargument space quickly across three prompts.

在三题中快速判断可用论点、例证与反方空间。

- Build a complete thesis-reasons-counterargument-judgement structure.

用 thesis-reasons-counterargument-judgement 搭建完整论证。

- Produce concise, controlled and checked English under the time limit.

在有限时间内完成简洁、有控制力并经过检查的英文文章。

KNOWLEDGE MAP

Check Every Knowledge Unit

逐项核对知识单元

B1	Prompt Choice and Question Decomposition 选题与问题拆解
B2	A Clear and Qualified Thesis 明确且可限定的主张
B3	Reasons, Examples and Explanation 理由、例证与解释
B4	Counterargument and Response 反方与回应
B5	Paragraph Logic and Cohesion 段落逻辑与衔接
B6	Evaluation and Final Judgement 权衡与最终判断

QUESTION METHODS

What to Notice, How to Start, What to Check

看到什么，怎样开始，如何检查

01	Choose the prompt with a three-column test 用三列表选题
TRIGGER	One prompt produces the strongest emotion but no reliable example or counterargument. 三道题中有一题让你情绪最强，但想不到可靠例子或反方。
ACTION	For each prompt, write a position, two explainable reasons and one objection. Choose the prompt that forms a complete argument quickly, not the most familiar or controversial topic. 每题各写立场、两条可解释的理由、一个反方；优先选择能快速形成完整论证的题，而非看起来最熟或最有争议的题。
CHECK	If no counterargument or concrete example appears within two minutes, compare the other prompts again. 两分钟后仍写不出反方或具体例子，就重新比较其他题。
02	Build each paragraph as Claim-Why-Example-Limit 每段完成 Claim-Why-Example-Limit
TRIGGER	The essay reads like a list of opinions, with many examples but no explanation of how they support the conclusion. 作文像观点清单，例子很多但没有说明为何支持结论。
ACTION	State the paragraph claim, explain the causal mechanism, ground it with one concrete example, then identify a limit or concession. 先给段落主张，再解释因果机制，用一个具体例子落地，最后说明适用边界或对反方的让步。
CHECK	The reasoning should remain visible without the example, and the example should have a precise evidential role when retained. 删掉例子后仍能看到推理；保留例子时能看出它具体证明了什么。
03	Concede the strongest objection, then limit its conclusion 先承认最强反方，再缩小其结论
TRIGGER	The response says only that some people disagree but they are wrong, or ignores an obvious counterexample. 你只写“有人不同意，但他们错了”，或完全忽略明显反例。
ACTION	State fairly when the objection succeeds, then explain why it requires an exception, safeguard or boundary rather than overturning the qualified thesis. 准确陈述反方在什么条件下成立，再说明它为什么只要求例外、监管或边界，而不必推翻你的限定主张。
CHECK	An opposing reader should recognise their strongest reason, while your reply still advances the final judgement. 反方读者会认为你公平陈述了他的最好理由，而你的回应仍推动最终判断。

Mantou Original: Should City-Centre Public Transport Be Free?

满托原创例題：公共交通是否应在城市中心免费

PROBLEM	Prompt: Should public transport in city centres be free for all passengers? Build an argument outline suitable for a 40-minute essay. 題目：城市中心的公共交通是否应对所有乘客免费？请设计一个可在 40 分钟内完成的论证骨架。
Qualify the thesis 第 1 步：限定主张	Do not argue that free travel is always good. Argue that basic public transport can be free in congested city centres where replacement funding is clearly identified. 不把问题写成“免费一定好”，而是主张：在拥堵严重、替代资金明确的城市中心，基础公共交通可以免费。
Arrange two reasons 第 2 步：安排两条理由	First, lower prices can change some short-distance travel choices. Second, low-income residents gain fairer access to employment and public services. Explain the mechanism in each case. 理由一是价格下降能改变部分短途出行选择；理由二是低收入者能更公平地进入就业和公共服务。每条都要解释机制。
Address the strongest objection 第 3 步：处理最强反方	Free travel can create fiscal pressure and excessive demand. Answer with a geographic boundary, congestion-based funding and a capacity threshold rather than pretending costs do not exist. 反方指出免费会造成财政压力和过度使用。回应是设定区域边界、拥堵资金来源与运力门槛，而非宣称成本不存在。
Reach a judgement 第 4 步：形成判断	The conclusion compares benefits with conditions: the policy is justified only if financing is sustainable, capacity increases and private-car journeys are genuinely replaced. 结论比较收益与条件：政策是否合理取决于能否持续融资、增加运力并确实替代私家车出行。
CONCLUSION	A defensible outline contains a qualified thesis, two explained reasons, the strongest objection and response, and a conditional final judgement. 一个合格骨架应有可限定 thesis、两条被解释的理由、最强反方及回应，并在结尾给出带条件的权衡判断。
COMMON TRAP	Writing a list of transport benefits or stacking city examples without explaining how they support the thesis. 把作文写成交通优点清单，或堆砌城市案例却没有说明它们怎样支持主张。

ACTIVE RECALL

Close the Notes Before You Answer

合上笔记再回答

01	What three usable assets matter when choosing a prompt? 选题时最重要的三个可用资产是什么？
ANSWER	A defensible position, at least two explainable reasons or examples, and a counterargument you can answer fairly. 可辩护的立场、至少两条能解释的理由/例子，以及一个可以公平回应的反方。
02	Why must an example be followed by explanation? 例子后面为什么必须有解释？

ANSWER

An example says what happened; explanation shows how it supports the paragraph claim.

例子本身只说明发生过什么；解释才建立它与段落主张之间的支持关系。

03**Why can a qualified thesis be stronger than an absolute one?**

限定主张比绝对主张更强的原因是什么？

ANSWER

It states the conditions, accommodates real counterexamples and makes the judgement more defensible.

它明确适用条件，能吸收真实反例，并让最终判断更精确、更可辩护。

EAL Sentence and Evidence Bridge

英语长句与证据边界

Do not translate word by word. Recover the core clause, qualifiers, references, turns and strength of commitment.

不追求逐词翻译，而是抓主干、限定、指代、转折和语气强度。

LEARNING OUTCOMES

- Separate a long sentence's core proposition from subordinate qualifications.

拆出长句的主干命题与从属限定。

- Track the referents of pronouns, demonstratives and logical connectives.

跟踪代词、指示词和逻辑连接词指向的内容。

- Distinguish evidence strength created by words such as may, often, only and all.

区分 may、often、only、all 等词带来的证据强度。

KNOWLEDGE MAP

Check Every Knowledge Unit

逐项核对知识单元

E1	Sentence Core and Subordination 长句主干与从属信息
E2	Qualifiers and Absolutes 限定词与绝对词
E3	Reference and Concept Tracking 指代与概念跟踪
E4	Tone, Attitude and Evaluation 语气、态度与评价
E5	Textual Evidence and Outside Knowledge 文本证据与外部知识

QUESTION METHODS

What to Notice, How to Start, What to Check

看到什么，怎样开始，如何检查

01	Circle finite verbs and recover the shortest core 先圈谓语，再恢复最短主干
----	--

TRIGGER	A sentence runs across several lines and parenthetical or subordinate clauses separate the subject from the main claim. 一句话跨三四行，插入语和从句让主语与结论失去联系。
ACTION	Find the main finite verb and subject, temporarily bracket clauses beginning with which, although or because, understand the shortest proposition, then restore each qualification. 先找主句谓语和主语，临时括起 which、although、because 等从属部分；读懂最短命题后，再逐层把限定加回去。
CHECK	Can you restate the core in about ten English words or one Chinese sentence, then explain what each subordinate clause limits? 你能否先用十个左右英文词或一句中文复述主干，再说明每个从句限制了什么？

02	Place strength words on a visible scale 给强度词做可视化刻度
TRIGGER	The passage says some, may or often while an option says all, must, always or only. 原文说 some/may/often，选项却写 all/must/always/only。
ACTION	Mark possibility, frequency, quantity and exclusivity separately. Any option stronger than the passage on one dimension requires additional evidence. 把可能性、频率、数量和排他性分别标出；选项只要在任一维度比原文更强，就需要额外证据。
CHECK	Compare scope word by word: sometimes does not entail always, and an important cause does not entail the only cause. 逐词比较范围：有时不能推出总是，重要原因不能推出唯一原因。

03	Separate what I know from what the author says 把“我知道”与“作者说”分栏
TRIGGER	An option matches common sense or course knowledge but lacks explicit support in the passage. 某选项符合常识或你的课程知识，但文章没有明确支持。
ACTION	Divide the notes into Text and Outside. Keep an option only when the Text column can satisfy the stem; Outside knowledge may aid comprehension but cannot supply missing evidence. 草稿分成 Text 与 Outside 两栏；只有 Text 栏能完成题干要求时才保留该选项，Outside 栏只能帮助理解背景，不能补齐证据。
CHECK	If your background knowledge is hidden, can the answer still be derived from the passage and its logical connections? 若遮住你的背景知识，仍能从文章句子和逻辑连接推出答案吗？

Mantou Original: How a Qualifier Changes Claim Strength

满托原创例题：限定词如何改变结论强度

PROBLEM	Which conclusion is supported by: Although remote work may reduce commuting for some employees, it does not by itself eliminate the need for urban transport investment? 原句：Although remote work may reduce commuting for some employees, it does not by itself eliminate the need for urban transport investment. 哪个结论被原句支持？
Recover the core clause 第 1 步：恢复主干	The main clause is remote work does not eliminate the need for investment. The although clause concedes a limited effect. 主句是 remote work does not eliminate the need for investment。although 从句承认一个有限影响。
Mark the strength words 第 2 步：标出强度	May, some and by itself all constrain the claim. The sentence says neither that remote work will reduce all commuting nor that it has no effect. may、some 和 by itself 都限制结论；原句既没有说远程办公一定减少通勤，也没有说它毫无影响。
Draw the minimum inference 第 3 步：形成最小推断	Even if remote work reduces commuting for some people, that change alone is insufficient to show that cities no longer need transport investment. 即使远程办公减少部分人的通勤，仅凭这一变化也不足以断定城市不再需要交通投资。
CONCLUSION	Remote work may reduce some commuting demand, but this alone does not establish that urban transport investment is unnecessary. 被支持的结论是：远程办公可能降低部分通勤需求，但不能单独证明城市交通投资已无必要。
COMMON TRAP	Reading may as will, some as all, or ignoring by itself and claiming that remote work is irrelevant to transport investment. 把 may 读成 will、some 读成 all，或忽略 by itself 而断言远程办公与交通投资完全无关。

ACTIVE RECALL

Close the Notes Before You Answer

合上笔记再回答

01	Why identify the main finite verb first? 读长句时为什么先找主句谓语？
ANSWER	It recovers the shortest core proposition and prevents a subordinate detail from becoming the main claim. 它能恢复最短核心命题，避免把从句细节误当成作者的主要判断。
02	Why can the difference between may and must decide an option? may 与 must 的差别为什么会决定选项正误？
ANSWER	May expresses possibility while must expresses necessity and therefore needs much stronger evidence. may 只表达可能性，must 表达必然；后者需要显著更强的证据。

03

What may outside knowledge do in Section A, and what may it not do?

背景知识在 Section A 中可以做什么、不能做什么？

ANSWER

It may help with context but cannot replace textual evidence or add an unstated premise.

它可以帮助理解语境，但不能替代文章证据或补出作者没有表达的前提。

The 95+40 Minute Execution Plan

95+40 分钟执行节奏

Allocate time to passage reading, answer validation, review and writing instead of relying on a last-minute rescue.

把时间分配到文章、验证、复查和成文，而不是靠最后几分钟补救。

LEARNING OUTCOMES

- Set a baseline time and stop-loss rule for each Section A passage set.

建立 Section A 每篇文章的基准时间和止损点。

- Use flagging and review rules so one question cannot consume the whole paper.

使用标记与复查规则，不让单题吞掉整套节奏。

- Reserve explicit time in Section B for prompt choice, planning, writing and checking.

为 Section B 预留选题、计划、成文和检查的明确时间。

KNOWLEDGE MAP

Check Every Knowledge Unit

逐项核对知识单元

T1	Section A Passage Budget Section A 文章预算
T2	Triage, Stop-Loss and Flagging 难题止损与标记
T3	Evidence-led Review 证据型复查
T4	Section B Writing Budget Section B 写作预算

QUESTION METHODS

What to Notice, How to Start, What to Check

看到什么，怎样开始，如何检查

01	Budget by passage set, not isolated question 用文章包而非单题分配时间
TRIGGER	Early questions receive detailed attention, leaving too little time to read later passages properly. 前几题做得很细，后半程文章来不及完整阅读。

ACTION	Reserve roughly 10-12 minutes for final review, then divide the remaining time across 12 passage sets. Each set includes the skim, three or four questions and evidence confirmation; record the median in practice. 先预留约 10-12 分钟总复查，再把其余时间分给 12 篇文章包；每包包含通读、3-4 题和证据确认，训练时记录实际中位数。
CHECK	At each checkpoint, does the number of completed passages match the remaining time? 到每个检查点时，已完成文章数是否与剩余时间匹配？
02	Use a 90-second no-new-evidence stop-loss 设置 90 秒无新证据止损
TRIGGER	You alternate between two options without returning to the passage for new support or contradiction. 你在两个选项之间反复切换，却没有回到原文找到新的支持或反证。
ACTION	If 90 seconds produces no new textual evidence, record the current best answer, flag it and continue. On review, revisit only the evidence location rather than rereading the whole passage. 若 90 秒内没有新增文本证据，记录当前最佳答案、标记题目并继续；复查时只看重证据位置，不从头重读整篇。
CHECK	Is more time producing new evidence, or merely repeating the same hesitation? 继续耗时是否真的产生了新证据，还是只是重复犹豫？
03	Split the 40 minutes into 5-8-24-3 把 40 分钟拆成 5-8-24-3
TRIGGER	Prompt choice is slow, planning happens while writing, or no time remains to check the thesis and sentences. 选题太慢、边写边想，或写完没有时间检查主张与句子。
ACTION	Use about 5 minutes to compare prompts, 8 to build the thesis, reasons and counterargument, 24 to write, and 3 to check task coverage, paragraph completeness and obvious language errors. Adjust from personal data after practice. 约 5 分钟比较题目，8 分钟搭建 thesis/理由/反方，24 分钟成文，3 分钟检查题目是否回答、段落是否完整和明显语言错误；训练后按个人数据微调。
CHECK	Before drafting, do you know the role of every paragraph and the final judgement? 正式成文前是否已经知道每段的作用和最终判断？

Mantou Original: Building Section A Time Checkpoints

满托原创例题：建立 Section A 时间检查点

PROBLEM	You reserve 11 minutes for Section A review. Build simple checkpoints for 12 passages and explain what to do when one passage runs three minutes over budget. 你计划给 Section A 留 11 分钟复查。请为 12 篇文章建立简单的进度检查点，并说明某篇超时 3 分钟时如何处理。
Calculate first-pass time 第 1 步：算可用首轮时间	Ninety-five minus 11 leaves 84 minutes, or about 7 minutes per passage set. 95-11=84 分钟，平均每篇文章包约 7 分钟。 (95 minus 11) divided by 12 equals 7 minutes
Set four checkpoints 第 2 步：设四个检查点	Aim to finish passages 3, 6, 9 and 12 at roughly minutes 21, 42, 63 and 84. This is easier to execute than watching every question. 约第 21、42、63、84 分钟分别完成第 3、6、9、12 篇；这比逐题盯钟更容易执行。
Rebalance after an overrun 第 3 步：超时后重平衡	Flag unresolved questions and leave them. Do not deduct equal time from every later passage; use the next two sets to move back towards the checkpoint, then use reserved review time. 把未解决问题标记并离开，不从后续每篇平均硬扣时间；先用接下来两篇恢复至检查点附近，最后用预留复查处理。
CONCLUSION	Use about 84 minutes for the first pass, approximately 21 minutes per three passages, then spend the final 11 minutes reviewing flags from their evidence locations. 首轮约 84 分钟、每三篇约 21 分钟，末尾 11 分钟按标记和证据位置复查。
COMMON TRAP	Dividing all 95 minutes without reserving review, or rushing through later passage reading because one set overran. 把 95 分钟全部平均分完而不留复查，或因一篇超时就仓促跳过后续文章的通读。

ACTIVE RECALL

Close the Notes Before You Answer

合上笔记再回答

01	Why is timing by passage set more reliable than timing every question? 为什么按文章包计时比按单题计时更可靠？
ANSWER	Reading is a shared cost and question difficulty varies; passage-set timing captures the real total and reduces clock checking. 文章阅读是共同成本，3-4 题难度也不均；按包能观察真实总成本并减少频繁看钟。
02	What is the key trigger for the 90-second stop-loss? 90 秒止损触发的关键条件是什么？

ANSWER

Not time alone, but continued hesitation without any new textual evidence.

不是单纯时间到了，而是继续犹豫却没有获得任何新的文本证据。

03**What should the Section B planning time produce?**

Section B 的计划时间要产出什么？

ANSWER

A thesis, paragraph roles, main examples, the strongest counterargument and the final judgement.

明确 thesis、每段作用、主要例证、最强反方与最终权衡判断。

Review Loop

把复习变成下一步行动

01	Complete your profile 先完成个人档案	Record curriculum, learning stage, English reading and writing background, and weekly study time. 记录课程体系、学习阶段、英文阅读写作基础和每周可用时间。
02	Build the method by module 按模块建立方法	Secure the Section A and EAL evidence boundaries before building the Section B writing and timing framework. 先掌握 Section A 与 EAL 证据边界，再建立 Section B 和时间执行框架。
03	Take the original starting practice 进入原创起点练习	Use the original on-site Section A and Section B practice to record answers, time, answer changes and writing drafts. 用站内 Section A 和 Section B 原创练习记录答案、耗时、改答与写作草稿。
04	Review from evidence 只根据证据复盘	For reading, record the exact distractor error. For writing, record the thesis, reasons, counterargument, judgement and timing breakpoint. 阅读题记录错误选项的具体错因；写作记录 thesis、理由、反方、判断和时间断点。

Version Boundary and Official Anchors

版本边界与官方依据

The official LNAT preparation guide and Practice Test Commentary are used only to verify exam structure, skill boundaries and method terminology. All bilingual explanations, methods, examples and active-recall prompts are independently written by Mantou; no official passage, question, option or explanation is copied or adapted. Official files remain in the internal research archive and cannot be downloaded here.

本笔记以 LNAT 官方备考指南与官方 Practice Test Commentary 核对考试结构、能力边界和方法术语；双语解释、方法、例题和主动回忆均为满托独立创作，不复制或改写官方文章、题目、选项与讲解。官方原件只保存在内部研究区，不能从本站下载。

After the Foundation Edition, verify Section A through long-passage sets and 95-minute practice, then develop Section B through 40-minute writing, a human rubric and teacher feedback. Machine scores do not replace real reading and writing evidence.

完成基础版后，通过长文章题组与 95 分钟限时练习验证 Section A，再用 40 分钟写作、人工 rubric 与教师反馈推进 Section B；系统不会用机器分数替代真实阅读与写作证据。

Your Guide to Preparing for the LNAT

Used to verify that LNAT requires no prior legal knowledge, the skill objectives of Sections A and B, and official preparation principles for reading, multiple-choice questions and writing.

核对 LNAT 不要求法律学科知识、Section A 与 Section B 的能力目标，以及阅读、选择题与写作的官方备考原则。
